

Alex Products, Inc.

ENVIRONMENTAL POLICY

It is our belief that a sound environmental management system enables us to achieve our goal to be a good neighbor to the communities of Ridgeville Corners, Paulding, and Bryan relevant to environmental issues, and to provide a clean, healthy, and safe work environment for all employees.

It is our policy to identify activities that have an adverse impact on the environment or humanity and strive to reduce that impact through continual improvement and protection of the environment. We are committed to compliance with all governmental regulations and other requirements as applicable, providing a framework to achieve our objectives and targets. In addition, this policy is documented and conveyed to all employees and persons working on our behalf and posted for public viewing.

David Von Deylen
President & Chief Executive Officer
